The diagram illustrates the process of mounting the window frame. It consists of four panels showing the progression from a bare frame to a fully installed unit. Red lines and arrows indicate the placement and direction of the mounting brackets and screws. The final panel shows the completed installation with a green checkmark.

This diagram illustrates the fourth step of the gutter installation process. It shows a green gutter being attached to the edge of a roof. A red stapler is used to secure the gutter to the roof's wooden batten. A green piece of material, likely a sealant or underlayment, is shown being applied to the roof edge. A red dashed line indicates the intended position of the gutter. An inset shows a close-up of the gutter's end cap being secured with a screw, with a red arrow indicating a distance of approximately 2 cm from the edge.
